

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0579-0036. The time required to complete this information collection is estimated to average 2 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

**OMB APPROVED**  
0579-0036  
Exp.: 10/31/2018

This report is required by law (7 U.S.C. 2143). Failure to report according to the regulations can result in an order to cease and desist and to be subject to penalties as provided for in Section 2150.

**ASSURANCE STATEMENTS**

- Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- Each principal investigator has considered alternatives to painful procedures.
- This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- The attending veterinarian for this research facility has appropriate authority to ensure the provisions of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

ASSURANCE STATEMENTS

- Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- Each principal investigator has considered alternatives to painful procedures.
- This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- The attending veterinarian for this research facility has appropriate authority to ensure the provisions of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

13. Other Animals					

ASSURANCE STATEMENTS

- Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- Each principal investigator has considered alternatives to painful procedures.
- This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- The attending veterinarian for this research facility has appropriate authority to ensure the provisions of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

- Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual research, teaching, testing, surgery, or experimentation were followed by this research facility.
- Each principal investigator has considered alternatives to painful procedures.
- This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and approved by the Institutional Animal Care and Use Committee (IACUC). A summary of all such exceptions is attached to this annual report. In addition to identifying the IACUC approved exceptions, this summary includes a brief explanation of the exceptions, as well as the species and number of animals affected.
- The attending veterinarian for this research facility has appropriate authority to ensure the provisions of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0579-0036. The time required to complete this information collection is estimated to average 2 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

## Column E Explanation

This form is intended as an aid to completing the Column E explanation. It is not an official form and its use is voluntary. Names, addresses, protocols, veterinary care programs, and the like, are not required as part of an explanation. A Column E explanation must be written so as to be understood by lay persons as well as scientists.

USGS National Wildlife Health Center  
6006 Schroeder Rd  
Madison, WI 53711

1. Registration Number: 10-F-1008
2. Number 22 of animals used in this study.
3. Species (common name) Mexican free-tailed bats of animals used in the study.
4. Explain the procedure producing pain and/or distress.

Animals will be infected with White-nose syndrome and may experience some unrelieved discomfort, illness, and possibly death.

5. Provide scientific justification why pain and/or distress could not be relieved. State methods or means used to determine that pain and/or distress relief would interfere with test results. (For Federally mandated testing, see item 6 below)

White-nose syndrome (WNS) is a condition that affects hibernating bats, thus for ecological relevance, the experimental infection trials will be conducted on torpid bats. The intent of this proposed experiment is to document the whether WNS can develop WNS under laboratory conditions. Because changes in ambient lighting, changes in airflow patterns, or handling the bats will cause them to arouse from torpor, human interactions with bats following initiation of the infection trial will be minimized. As infected bats will be maintained in torpor, a condition characterized by inactivity, it will not be possible to make a fine determination between a terminally ill animal and a hibernating animal.

6. What, if any, federal regulations require this procedure? Cite the agency, the code of Federal Regulations (CFR) title number and the specific section number (e.g., APHIS, 9 CFR 113.102):

Agency \_\_\_\_\_ CFR \_\_\_\_\_

2. Number 29 of animals used in this study.
3. Species (common name) thicket rats, Gambian pouched rats, rope squirrels of animals used in the study.
4. Explain the procedure producing pain and/or distress.

Animals will be infected with monkeypox virus and thus will experience some unrelieved discomfort, illness, and possibly death.

5. Provide scientific justification why pain and/or distress could not be relieved. State methods or means used to determine that pain and/or distress relief would interfere with test results. (For Federally mandated testing, see item 6 below)

No other methods exist to study pathogenesis in animals. Efforts will be made to reduce distress and discomfort to the animals. All animals will be monitored twice per day (first thing in morning and late afternoon, at approx. 6- 8 hours between intervals) during the first 10 days (based on previous experiments morbidity was only observed during the first 10 days); any severely ill animals (recumbent, labored breathing, disinclination or inability to move, eat or drink) will be humanely euthanized. If signs of morbidity are observed in animals after the initial 10 days post infection then animals will continue to be monitored twice per day until morbidity is no longer occurring or the experiment is terminated.

6. What, if any, federal regulations require this procedure? Cite the agency, the code of Federal Regulations (CFR) title number and the specific section number (e.g., APHIS, 9 CFR 113.102):

## Column E Explanation

This form is intended as an aid to completing the Column E explanation. It is not an official form and its use is voluntary. Names, addresses, protocols, veterinary care programs, and the like, are not required as part of an explanation. A Column E explanation must be written so as to be understood by lay persons as well as scientists.

Madison, WI 53711

1. Registration Number: 10-F-1008
2. Number 111 of animals used in this study.
3. Species (common name) grasshopper mice, black-tailed and white-tailed prairie dogs of animals used in the study.
4. Explain the procedure producing pain and/or distress.

Animals were vaccinated against plague or received a placebo and then challenged with virulent plague to evaluate vaccine efficiency.

5. Provide scientific justification why pain and/or distress could not be relieved. State methods or means used to determine that pain and/or distress relief would interfere with test results. (For Federally mandated testing, see item 6 below)

The purpose of this research is to develop a protective vaccine for both the prairie dog and the ferret. The animals were utilized to test the efficacy of the plague vaccine. The end point for the experiment is discerning whether or not the control and treated animals have developed the signs and symptoms of the disease and/or if the vaccine has effectively prevented the disease from occurring. Therefore it is critical for the disease process to occur without the confounding effects of tranquilizing, analgesic or anesthetic drugs. Animals were euthanized as soon as the signs and symptoms of an infection were observed and confirmed.

6. What, if any, federal regulations require this procedure? Cite the agency, the code of Federal Regulations (CFR) title number and the specific section number (e.g., APHIS, 9 CFR 113.102):

## Column E Explanation

This form is intended as an aid to completing the Column E explanation. It is not an official form and its use is voluntary. Names, addresses, protocols, veterinary care programs, and the like, are not required as part of an explanation. A Column E explanation must be written so as to be understood by lay persons as well as scientists.

1. Registration Number: 52-R-0011
2. Number 3 of animals used in this study.
3. Species (common name) SHEEP of animals used in the study.
4. Explain the procedure producing pain and/or distress.

\_\_\_\_\_

This is a model of damage to joint cartilage (induced arthritis).

5. Provide scientific justification why pain and/or distress could not be relieved. State methods or means used to determine that pain and/or distress relief would interfere with test results. (For Federally mandated testing, see Item 6 below)

\_\_\_\_\_

Evaluation of level of pain and use of limb is pivotal to assessing efficacy of the treatment (FUS nerve ablation). However, animals will be monitored closely and scored for level of pain and discomfort and significant levels of discomfort will be treated with buprenorphine for 1-2 days. If significant pain persists beyond that time, based on pain scoring system, the sheep will be further maintained on analgesics or euthanized.

## Column E Explanation

1. Registration Number: **52-R-0012** Customer Number: **492**

2. Number of animals used in the study: **Category E - 60**

3. Species (common name) of animals used in the study: **Hamster**

4. Explanation of the procedure producing pain and/or distress:

The objective of this study is (b)(4)

(b)(4) Death is not an endpoint. At the first sign

) will start to appear, at which time the affected hamsters will be euthanized.

5. Scientific Justification why pain and/or distress could not be relieved. A description of the methods or means used to determine that pain and/or distress relief would interfere with test results. (If Federally mandated testing, a description is provided in Item 6 below.)

The researchers have not (b)(4) before, and a literature search demonstrated that the research has not been done before. It is conventional wisdom, based on the researcher's 29+ years of (b)(4), and communication with expert colleagues in this field of study, that use of pain relieving drugs will complicate interpretation. (b)(4)

le

6. The federal regulation(s) requiring this procedure is/are listed below. The agency, the Code of Federal Regulations (CFR) title number and the specific section number are provided.

## USDA ANNUAL REPORT OF RESEARCH FACILITY

REPORTING PERIOD: October 1, 2012 – September 30, 2013

REGISTRANT: Eastern Virginia Medical School (EVMS), Norfolk, VA

REGISTRATION NUMBER: 52-R-0003

CUSTOMER NUMBER: 497

**SUMMARY OF THE EXCEPTIONS TO THE STANDARDS AND REGULATIONS OF THE ANIMAL WELFARE ACT  
APPROVED BY THE INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC)**

<b>IACUC-approved Exception</b>	<b>Brief Explanation of the Exception</b>	<b>Species Affected</b>	<b>Number of Animals Affected</b>
Single Housing of Social Animals	<p>Animals exhibiting territorial behavior, which results in fighting and possible injury, must be singly housed. Also, females on study may be pair-housed prior to experimentation; however, after insemination, they must be singly housed since they may be pregnant. The experiments are short in duration and do not require more than 18 days of housing, including acclimation.</p> <p>All rabbits are allowed "play time," which allows them to interaction with and see other animals; however, the interaction does not involve direct contact, which could lead to fighting.</p>	Rabbit	23
Single Housing of Social Animals	Animals are singly housed in BSL2 hood compartments and sterilizable caging due to the use of the following hazardous agents: <i>Staphylococcus aureus</i> and <i>Pseudomonas aeruginosa</i>	Rabbits	0
Single Housing of Social Animals	Female animals are singly housed if they inflict injury to themselves or another animal, if a compatible partnership cannot be established (e.g., animals that continually show aggression when feeding), or for medical reasons (e.g., weight loss). Males are singly housed except when breeding, due to aggressive, potentially injurious behavior.	Non-human Primate (Baboon)	15
Single Housing of Social Animals	All animals are pair-housed, except when recovering from surgery to allow the animal	Non-human Primate (Cynomolgus)	12

	to fully recover without possible injury or untoward behavior from a companion animal.	macaque)

### **Summary of Exceptions to the Regulations and Standards**

1. Deviation from aseptic technique. Invasive procedures will not be performed using aseptic technique due to simulation of battlefield conditions during the instruction of Tactical Combat Casualty Care (TCCC) using live patient models (swine). Euthanasia will be the endpoint without interruption of anesthesia/analgesia.

This exception has been approved, as per the animal use protocol, by the IACUC.

**Annual Report of Research Facility Continuation Sheet**

Facility: TQS Corp., P.O. Box 10537, Virginia Beach, VA 23450

Certificate Number: 52-R-0129

Customer Number: 327195

Exceptions.

The IACUC has approved an exception to the "aseptic procedures standard" under the Animal Welfare Regulations, specifically section 2.31 (d) (ix). Our surgical procedures are categorized as nonsurvival surgeries conducted in a non-sterile simulated combat environment; this exception is listed under section V.5.1.3. of our protocol. This exception affected 233 swine during the report period of April 23, 2013 thru September 30, 2013.
